

Environment & Fast Fashion is a discussion game based on the PlayDecide format.

It consists in a card game for simple, respectful & fact-based group discussion.

Environment & Fast Fashion enables players to get familiar with the environmental impact of fast fashion and how clothes are linked to climate change.

The game also invites players to look at the issue as a group and from different perspectives. **Environment & Fast Fashion** is suited for players aged **13+** and lasts **90 minutes**.

The ideal number of players is 4 to 8, with the possibility of splitting large groups into several smaller ones.

Environment & Fast Fashion was created as part of the PLS - National Plan for Science Degrees (Biology and Biotechnology, Science and Technology for Environment and Nature) of the University of Trieste, Italy, in collaboration with the students of the Global Change Ecology and Sustainability Master Degree (UniTS).
